** means voted without recommendation and not included in the vote count*

E means excused and not included in the vote count

Senate

E2SSB 5061, Prevailing wage rates: Requires public works contracts to include annual adjustments to the latest prevailing wage rate, rather than basing those wages on the prevailing wage rate in effect at the time of the applicable contract bid or award.

2ESHB 1210, Clean energy tax preference (includes PLA): Applies PLAs to construction requirements for the targeted urban area property tax exemption if the project is a clean energy transformation business facility requiring certification by a federal regulatory commission.

2ESSB 5360, Environmental crimes: Establishes a tiered system of crimes for certain violations of state environmental laws. Provides first-degree and second-degree felony violations for certain offenses under specified environmental laws in the state sentencing grid as seriousness level III and I offenses, respectively.

2SHB 2105, Employee notification of I-9 audits: Requires employers to notify workers within five days of receiving a federal Notice of Inspection of Employment Eligibility Verification Forms I-9, with similar notification of the results of inspection. Enforcement includes AG civil action as well as private right of action, with significant penalties possible.

E2SSB 5847, Workers Comp medical providers: Prevents an employer from requiring that a worker use a specific provider. Allow providers to deviate from the treatment guidelines when medically appropriate.

ESSB 6005, Transportation budget, supplemental: Provides additional and more stable funding for preservation, keeps major projects moving, and increases transportation spending by roughly $1.2 billion compared to the previously enacted 2025–27 transportation budget.

SSB 6225, Transportation funding bonds: Provides for bonding up to $800 million for the design, right-of-way, and construction of highway projects or improvements in support of the transportation supplemental budget.

ESHB 2442, Local government new tax authority: Expands local governments' authority to raise and use taxes, broadening options like sales, property, and real estate excise taxes to fund housing, public health, and social services. It also modifies property tax limits and levy rules.

SB 6136, Workers' comp rate reporting: Requires L&I to annually publish the actuarially indicated rate for each workers' compensation risk classification and disclose when it sets a premium rate below the actuarially indicated rate for any classification.

ESSB 6302, Public works/finishing trades: Requires L&I to investigate when there are three or more independent contractors performing finishing work on a public works project to determine whether those workers are being misclassified as independent contractors.

ESSB 6346, Income tax: Creates Washington's first broad-based income tax, imposing a 9.9% tax on household income above $1 million starting in 2028. It could also impact pass-through businesses. It also adds credits, deductions, and administrative provisions, while pairing the tax with future relief such as repealing certain sales taxes on services and expanding small-business tax credits. The revenue is intended to fund education, healthcare, and other public programs while shifting more of the tax burden to higher earners.

ESSB 6346, Income tax – amend 696: The act would have been null and void unless a constitutional amendment was approved by December 2026, capping the maximum tax rate at 9.9% and setting a minimum standard deduction of $1 million per household.

ESB 6347, Estate Tax: Rolls back Washington's recent estate tax increase by restoring lower pre-2025 rates starting July 1, 2026, replacing rates that had risen as high as 35%. It also resets the estate tax exemption to roughly $3 million for deaths after that date and modifies how the threshold is adjusted over time.

ESSB 5997, Supplemental Operating Budget: Updates the state's 2025–27 budget by adjusting spending across key areas like healthcare, childcare, education, and social services to reflect new costs and policy changes. It increases total spending by about $2.3 billion, bringing the full biennial budget to roughly $80.2 billion. The bill also relies on fund transfers and redirections, including the rainy-day fund, Public Works Assistance Account, capital gains revenue for school construction, and LEOFF1 pension funds, to balance the budget.

SB 6302, Independent contractor limits: Prohibits a contractor or subcontractor from engaging more than two independent contractors to perform finishing work on a public works project. (Committee vote on original version of bill that passed the Legislature.)

SB 6171, Large energy use (includes PLA): Requires that for any behind the meter energy system project, owned by an emerging large energy use facility, the facility receiving power from the system must ensure that any work associated with such a project will be performed under a PLA.
